

CANALS

Standards:

- Provide an 8-foot wide pedestrian area.
- Provide at least 3' of freeboard between the edge of the canal and the finished floor of development, outdoor dining or open space.
- Canals shall vary in width (from 19'- 42') throughout the canal zone depicted above.
- Provide continuous public access along canals, at least on one side.

Guidelines:

- Encourage balconies and other features that provide visual interest and a strong relationship between buildings and canal walkways.
